

## **Above-Ground Installation Kits**

The benefits of our above-grade installation kit include easy relocation and transportation, a great solution for leased space, minimal facility floor work, and no construction permits required (local codes may apply). Kits are available for each model chassis dynamometer regardless of the type of PAU being used. These all-inclusive kits contain the following items:

- Above grade panel kit
- Dynamometer vibration isolation mounts
- Heavy duty structural steel ramp (pair)
- Leveling kit
- Hardware mounting kit
- Tie down kit
