PD442-6 Engine Flywheel Adapter Plate Kit

The Phoenix Dynamometer Engine Flywheel Adapter Plate Kit [APK] is a simple, reliable, and easy to use kit for adapting to different engine flywheel configurations. The flywheel adapter plate bolts to the flywheel of the engine. The flywheel adapter plate is available with a rough-cut diameter, from 300-760 mm [12 – 30 in] and is pre-formed and machined to mate with a hub that bolts onto the driveshaft.

Final machining
of the outside diameter and drilling of the attaching holes to fit the clutch cover bolt holes in the flywheel must be performed by the purchaser to ensure correct fit. Additional adapter plates are available for purchase separately.

Flywheel Adapter Kit key features include:

- Designed & Built in the USA
- Powder Coated Wall Mount Hanger
- Adapter plate can be drilled with various flywheel patterns, avoid stocking different plates for each engine model tested.
- Hub is bolted to the flywheel adapter plate to ensure proper location and centering of the driveshaft and has threaded holes for direct attachment of driveshaft cap screws.

ALL IMAGES SHOWN ARE FOR ILLUSTRATION PURPOSE ONLY. ACTUAL PRODUCT MAY VARY DUE TO PRODUCT ENHANCEMENT.

Flywheel Adapter Kit includes:

- One 1710-1810 or 1880-1910 Style Hub
- Two 457 mm [18 in] diameter Adapter Plate Blanks
- Two 610 mm [24 in] diameter Adapter Plate Blanks
- One 762 mm [30 in] diameter Adapter Plate Blank
- One Adapter Plate Hanger Kit
