PD497 Instrumentation Boom

The Phoenix Dynamometer Instrumentation Boom is a simple, yet robust, cost-effective, and easy to use alternative to a rigid mounted system.

2 year WARRANTY

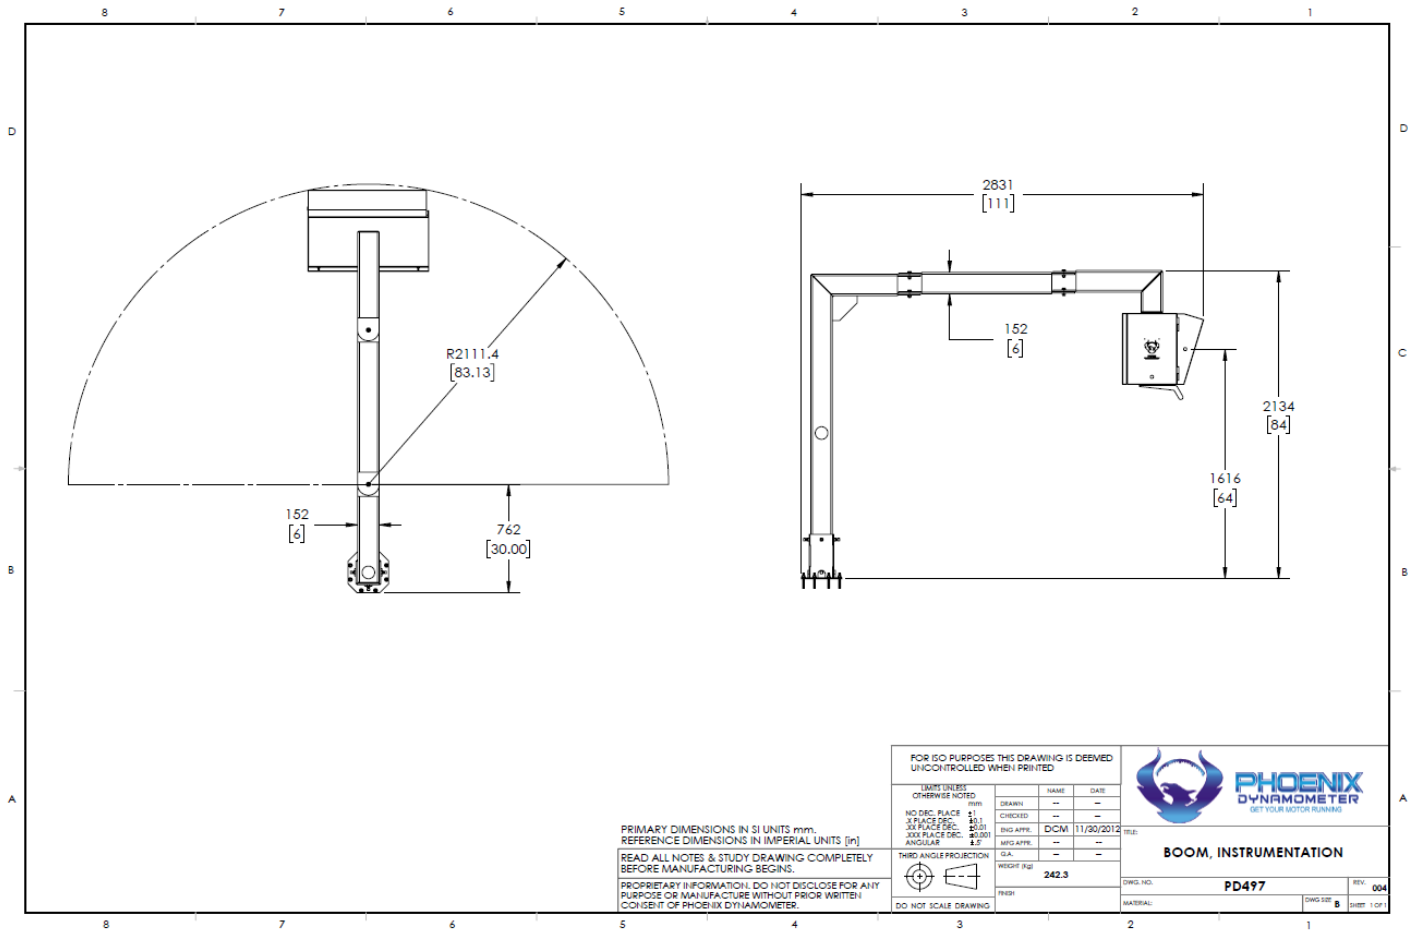

ALL IMAGES SHOWN ARE FOR ILLUSTRATION PURPOSE ONLY. ACTUAL PRODUCT MAY VARY DUE TO PRODUCT ENHANCEMENT.

Instrumentation Boom key features include:

- Double articulation allows the Instrumentation Boom to be stored closer to the wall, offers easier movement and a wider swing path
- Allows for rapid installation and removal of testing equipment
- Keeps pressure and temperature signal cables off the floor
- Provides a cleaner and safer work environment by keeping walkways clear
- Provides a professional appearance to your test cell
- A versatile solution when testing multiple engine types and sizes
- Heavy Duty Design
- Powder Coated Finish for Long Lasting Durability
- Easy installation (includes all necessary hardware)
